Rhino UK

About Us

Making Sense of Sensory

At Rhino UK, we're passionate about crafting accessible sensory spaces that support, uplift and transform lives.

Our friendly sensory team has over **75 years** of combined specialist sensory knowledge and experience. From enquiry through to your fully finished sensory space – they'll be on hand to guide, support, and manage your sensory journey.

We'll always strive to put your needs and budget at the centre of our plans, and because of this, our sensory installation process is highly collaborative.

Did you know that our passion for sensory doesn't stop at rooms? We also offer a range of portable, interactive and developmental sensory resources to complement all budgets and environments - so that you can support your senses fully!

At Rhino UK, we're proud to make sense of senses.

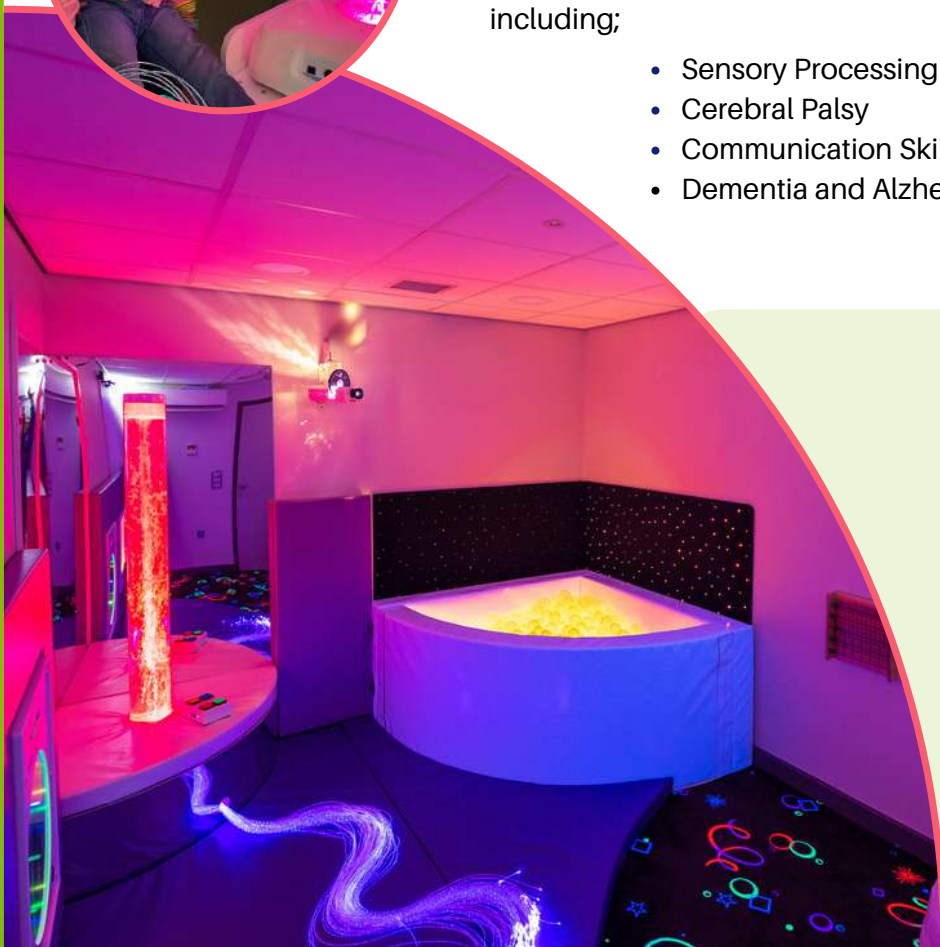

How can we help?

Every Sensory Room is unique. You'll never find two of the same. We like to work closely with parents, carers and healthcare professionals to craft bespoke spaces that meet individual needs, including;

- Sensory Processing Disorders
- Cerebral Palsy
- Communication Skills
- Dementia and Alzheimer's
- Autism
- Reminiscence
- Rehabilitation
- Visual Impairments

With you every step of the way

- Free design and planning service
- Free on-site demonstrations and product training
- Bespoke maintenance packages
- Value for money
- Ongoing support from our friendly sensory team

About Us

Why Choose Rhino?

We strive to go the extra mile with our designs, installations and customer service to provide complete customer satisfaction and the very best sensory experiences.

Discover what our customers have to say by reading the testimonials below.

“ The Sensory Room is brilliant and provides a variety of sensory experiences. I have received some magnificent feedback from our staff, professionals, children and parents. The installation was stress-free and very professional, and all equipment is high quality. I would certainly recommend your services to other Children's Centres!”

Linda Dunn, Outreach Manager, Kingsland Centre

“ We've had our sensory room for two years now and it's still as good as new, even though we use the room everyday! It's so versatile; we can use it for quiet sessions and energetic play. The children really love it and benefit from the space in their own individual way. Rhino's after sales service has also been second to none. Thank you once again.”

S Harpur, Play Co-Ordinator, Chesterfield Hospital

“ My experience with Rhino UK has been excellent, I would wholeheartedly recommend them to anyone wanting a quality sensory room. The Rhino team has a friendly, hands-on attitude and nothing is too much trouble for them. I am confident that we'll return to Rhino in the future when we're ready to develop our room further. Thank you so much!”

L Barrow, Manager, Middlewich Children's Centre

Our Sensory Rooms

Multi-Sensory Rooms

A Multi-Sensory Room is a dedicated space for therapeutic development and sensory play. Filled with a collection of light, sound, and tactile effects, Multi-Sensory Rooms are environments where users, young and old, can explore their senses and emotions safely.

Away from outside distractions, these immersive environments offer the opportunity for inclusive lessons, one-on-one therapy sessions and the time and space to develop key skills such as fine and gross motor, cause and effect, and hand-eye coordination.

Popular Multi-Sensory Room Products

Our Sensory Rooms

De-escalation

De-escalation Rooms are quiet environments that provide low levels of stimulation, enabling users to rebalance their senses, dispel anxiety and calm down. These spaces are particularly helpful for people with Autism, Learning Difficulties and Mental Illnesses.

Our therapeutic De-escalation Rooms are designed to calm, comfort and stabilise moods. They typically include soft floor and wall safety padding, a hiding den, bench seating, mood lighting, and distracting sensory ceiling effects.

Our Sensory Rooms

Safety Padding

Floor and wall padding can make any space safe.

Removing the worry of nasty bumps and bruises, and creating a safe environment for users to release energy and explore their senses.

Tailor-made by our sensory team, our safety padding is a soft and protective addition for any sensory room, soft play room, bedroom, corridor or bathroom. Timber-backed, machine sewn and made to measure, we will ensure our foam padding fits your space perfectly.

Case Study

St Crispin's School

St Crispin's is a special school in Edinburgh that supports the learning of pupils aged between 4-18 with complex learning disabilities and autism.

The school's community had outgrown their old building, and Edinburgh Council were keen to create a bigger and better space that could nurture their students' learning and development.

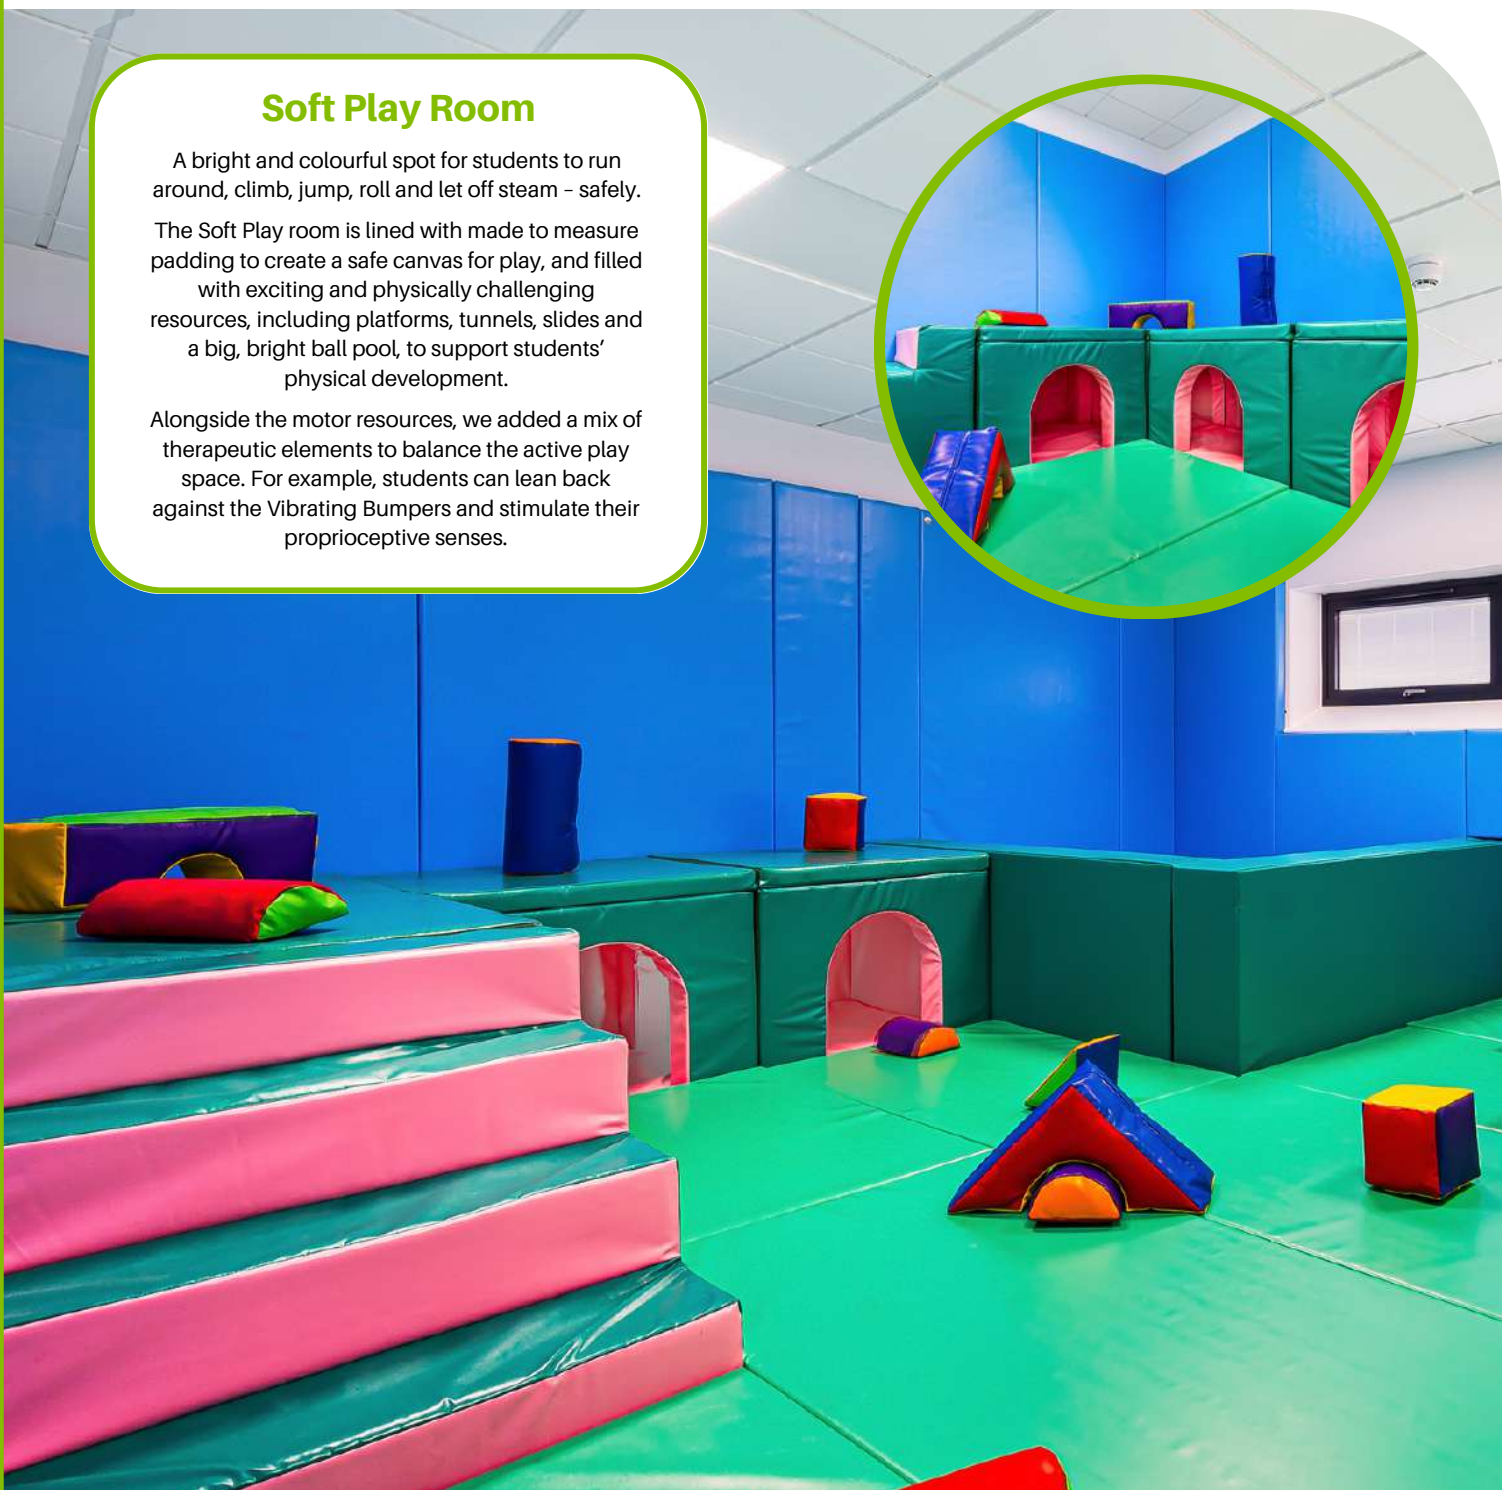

That's when they got in touch with our expert sensory team.

Soft Play Room

A bright and colourful spot for students to run around, climb, jump, roll and let off steam - safely.

The Soft Play room is lined with made to measure padding to create a safe canvas for play, and filled with exciting and physically challenging resources, including platforms, tunnels, slides and a big, bright ball pool, to support students' physical development.

Alongside the motor resources, we added a mix of therapeutic elements to balance the active play space. For example, students can lean back against the Vibrating Bumpers and stimulate their proprioceptive senses.

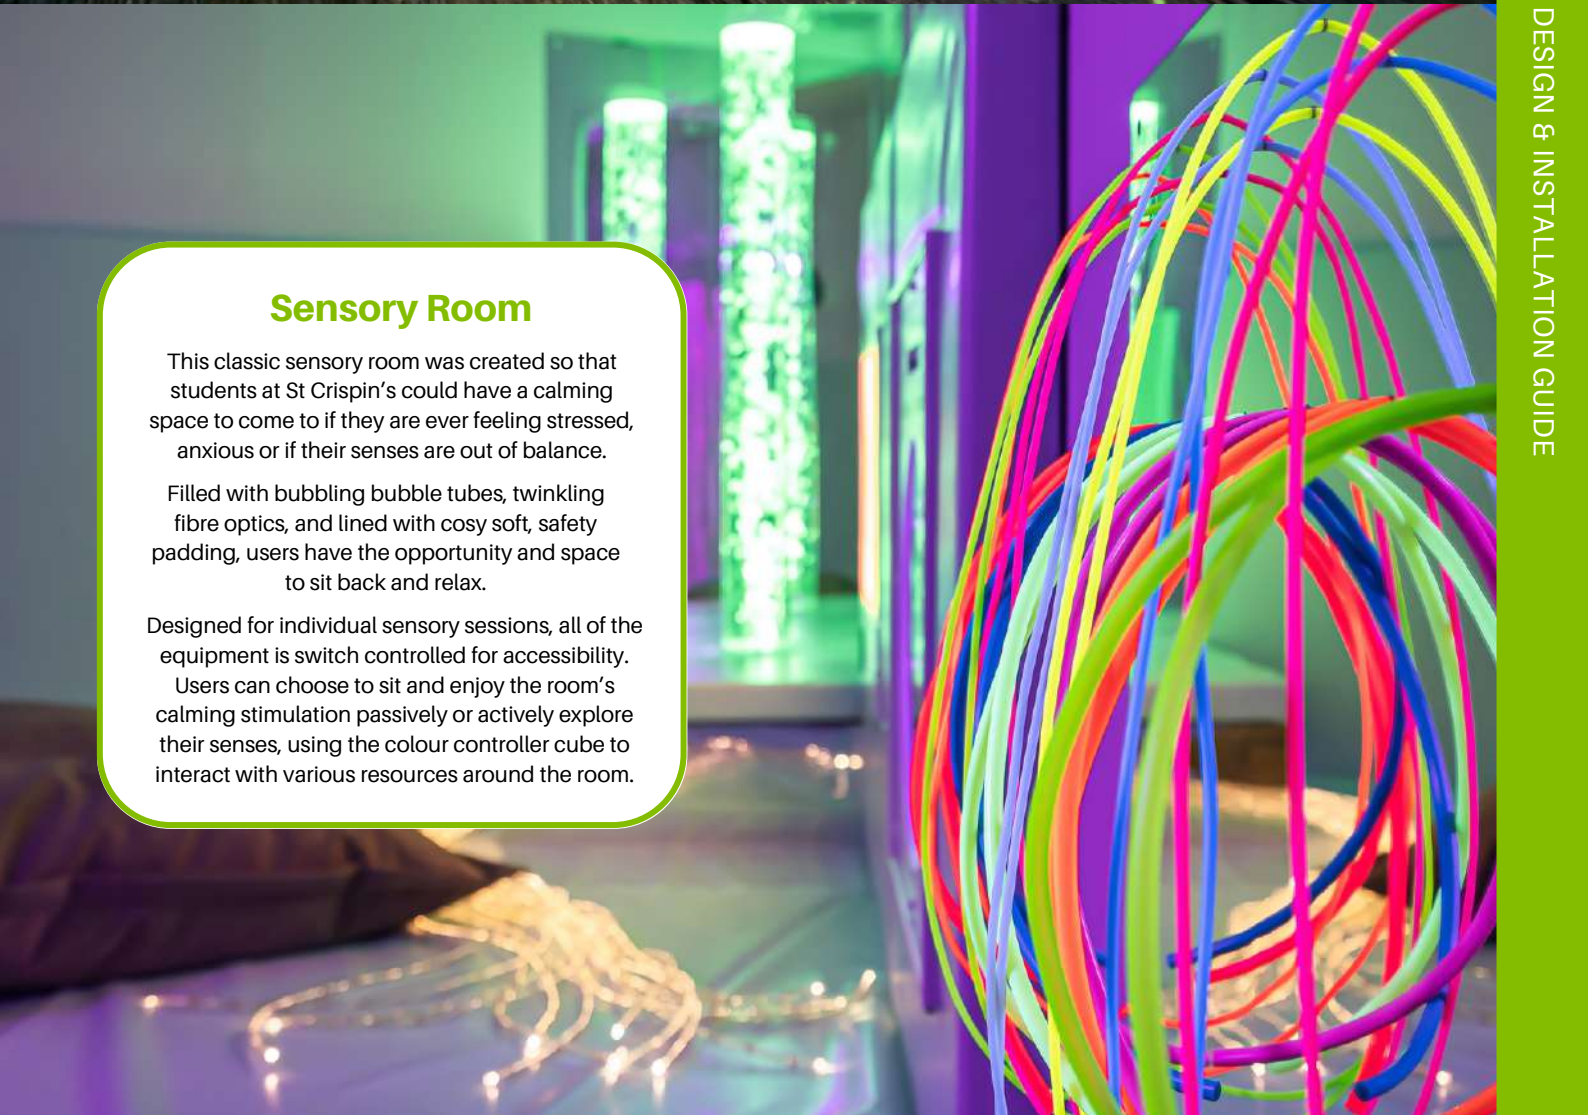

Immersive Reality Studio

Designed to inspire imaginations, shape senses, and offer a space for accessible, inclusive learning – St Crispin’s immersive Sensory Room Studio is a special place for students to escape reality and discover themselves.

A multi-projector set-up decorates the room’s walls and floor with interactive images and videos, immersing users in a dreamy, imaginative space. Using an iPad, users can easily change the room’s theme, whether that’s diving into the deep blue sea or hopping from flower to flower with a busy bee.

It’s a modern sensory space that’s perfect for engaging children’s minds, bodies and senses.

Sensory Room

This classic sensory room was created so that students at St Crispin’s could have a calming space to come to if they are ever feeling stressed, anxious or if their senses are out of balance.

Filled with bubbling bubble tubes, twinkling fibre optics, and lined with cosy soft, safety padding, users have the opportunity and space to sit back and relax.

Designed for individual sensory sessions, all of the equipment is switch controlled for accessibility.

Users can choose to sit and enjoy the room’s calming stimulation passively or actively explore their senses, using the colour controller cube to interact with various resources around the room.

Rhino UK

Design & Install Guide

Creating a sensory room takes time, expertise, and organisation – **which is why we're here to help!**

Years of sensory design experience have led us to create our tried and tested **6-Step Sensory Room Process**. Supporting you through your sensory room journey.

1. Design Consultation

Start your journey by booking in your free design consultation; remote or on-site.

After seeing your space, we will then sit down to discuss what you imagine your sensory room looking like.

Our friendly sensory room consultants will provide inspiration and expert advice on how they'll be able to transform your space into your sensory vision.

2. Room Design & Costs

After your consultation, we'll head back to our studio and craft your bespoke room design proposal, which will include:

- Full 3D visuals to bring your design to life
- An equipment cost breakdown
- Recommended room preparations

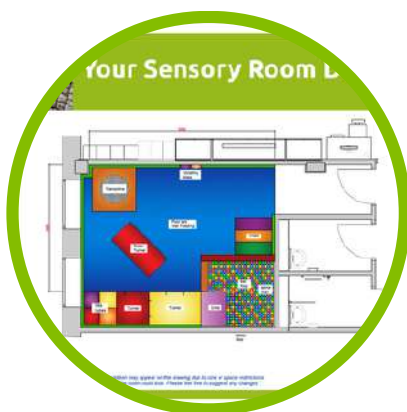

3. Design Review Meeting

We'll sit down together over a Teams meeting to discuss your design proposal.

This 30-minute meeting gives you the opportunity to collaborate closely with our sensory teams to ensure your room design works for your space, needs and budget.

After this meeting, and with your confirmation, we'll be able fast track your sensory room install.

4. Design Approval

With decisions made and designs signed off it's time to choose your finishing touches, colours, prints and more! Your assigned project manager will talk you through your final decisions, and the preparations that will need to be made before install.

If needed, we can collaborate with contractors and architects to refine your room, build, and specification to make a perfect sensory space.

5. Installation

We do our best to organise installs around your schedule and deadlines. And we'll aim to minimise disturbances, as our experienced fitters install your sensory room with ease and precision.

All of our fitters hold CSCS cards and DBS Certificates for ultimate client protection. Works are carried out in full accordance with all British Standards and Health & Safety requirements.

6. Handover & Training

Now that your room is complete and ready to use, it's time to get familiar with how it works.

One of our sensory specialists will be onsite to handover your room, talking you and your colleagues through the room's features and how to use them.

7. Maintenance Packages

All of our sensory installations come with 12 Months warranty and a lifetime of telephone support.

Or if you'd like extra security, you could consider one of our personalised Jungle Care Maintenance Packages that offer extended warranty and room cleaning services.

Sensory Room

Maintenance Services

We want to make sure you get the most out of your sensory space.

With regular inspections, **maintenance**, and a bit of tender loving care, you'll be able to keep your sensory equipment in great working order for a very long time.

To help you take care of your sensory space, we've put together a collection of **tailor-made maintenance packages** specially designed to help you take care of your sensory room.

Our maintenance packages are available as yearly contracts, offering extended warranty, safety checks, and cleaning visits.

We're also proud to offer **one-time room services** for those who might not have the budget to take out a yearly plan.

For more information and prices for our maintenance services, check the next page. And if you have any questions, don't hesitate to **get in touch** with a member of our team.

Maintenance Package Benefits

✓ Extends Your Warranty

All our maintenance packages extend your sensory room warranty, providing you with the assurance that your products are protected and covered.

✓ Budget Friendly

We offer three maintenance packages to suit different needs and budgets, as well as one-time service visits.

✓ Safe & Ready For Play

Our expert maintenance team will thoroughly check your room's wiring and electronics, ensuring the room is safe for play.

✓ Product Training & Advice

We'll provide on-site training and activity advice to help you maximise the benefits of your sensory room.

✓ Peace Of Mind

We'll make sure your sensory room is always up, running and looking it's best.

Terms & Conditions Apply. For full terms and conditions, get in touch.

Sensory Room FAQs

If you've got a question about anything included in this pack, your quotation, or anything to do with your sensory room, make sure you **get in touch** with a member of our friendly sensory team - they'll be more than happy to help!

We've answered some of our most popular questions below. Hopefully, it'll save you a phone call.

How much is an installation project likely to cost?

A classic sensory room project starts at around £5,000.

Discover how much your dream sensory room might cost using our Cost Calculator. Get started by scanning the QR code below.

Is there a cost for a sensory room design?

No. All of our designs are completely free of charge!

And we're happy to make as many changes and alterations until the design is completely right for you, your needs and budget.

How do I know which sensory equipment to choose?

Before each sensory project, our sensory specialists will sit down with you to discuss your needs, space and budget. From there they'll be able to recommend the best sensory resources for you.

How do I use the sensory equipment?

Every sensory installation is completed with a room handover, where we'll give you a full explainer of all of the room's elements and how you can use them to their full advantage.

And if you ever need any advice, we're always just a quick phone call away!

Can you help me fundraise for Sensory Equipment?

Yes! We have a free-to-download fundraising pack filled with information about grants, loans and fundraising ideas available to you.

Discover our funding page

How do I know what electrics the room needs?

Complete electrical plans are provided with each room design.

When it comes to installation, we have our own team of electricians, but if you'd like to use your own for the project that's not a problem.
