

Rhino Sensory Voyager

Inclusive, Portable & Practical

"The Voyager has transformed what could have been a challenging experience for our paediatric patients. Just having it there immediately creates a focus of fun and calm, making the room more welcoming."

Claire, Senior Radiographer at Southend Hospital

"We are absolutely delighted with our trolley. It was set to work within half an hour of its arrival, and it hasn't had a break since!"

Gail, Play Specialist at Northwick Park Hospital

"We used the Voyager last night with a toddler, he was really restless, but as soon as he saw the bubbles, he stayed perfectly still. His mum said it was the most content she'd seen him in days."

Claire, Senior Radiographer at Southend Hospital

What is a Rhino Sensory Voyager™?

The **Rhino Sensory Voyager™** is a uniquely portable kaleidoscope of colour, sound and touch - jam-packed with stimulating sensory potential.

They're typically used in **hospitals, schools** and **homes** to distract, calm and relax children and adults with Autism, Disabilities and PMLD.

Voyagers are **portable, practical**, and a perfect **space saving** sensory aid; wheel them between classrooms and through wards and watch as each environment lights up in a wonderfully warm sensory glow.

Sensory Voyager™ benefits

Uniquely portable: Fits perfectly through doorways and has handles so it can be pushed along corridors easily.

Easy to use: Plug in and play! Only one 13amp plug socket is required to light up the trolley.

Wipe clean: Specially designed for easy cleaning, perfectly for infection control environments.

Build your own voyager

Every Sensory Voyager™ is unique and built to meet your requirements and budget.

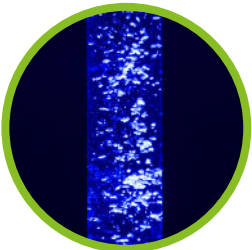

Pick and mix which elements, resources, and features you'd like your Voyager to have, add and build over time, and create a special sensory trolley perfect for you.

The size of the voyager is 1540mm x 690mm x 510mm
