

omiBudii

Affordable, portable, interactive projector fun.

omiBudii is our budget-friendly interactive projector. Like a **compact** version of the hugely popular omiMobii, the Budii instantly **creates interactive spaces** for people to engage with, develop their senses, and have lots of fun. Its smaller size makes it ideal for spaces that might not have floor or wall space available for play.

Inclusive Design

Built to engage children and adults with **autism, special educational needs**, and **disabilities**, the Budii creates an inclusive play surface where users can interact, develop and build their **social, communication** and **motor skills**.

The projector's sensors pick up the slightest movements, making it easy for people with limited mobility to join in with the fun.

Easy To Use

A handy **tactile remote** makes using the Budii simple. With big buttons, it's easy to turn the projector on and off, select activities and control volume settings.

App Suites

The Budii system comes complete with a library of **120 developmental games and activities** for you to get stuck into.

The Budii also includes an **Autism Suite** filled with activities specially designed for people on the autism spectrum, covering social interaction, flexible thinking, personal organisation, emotional understanding and sensory calming.

Transform Any Surface

The Budii projector magically transforms any surface below it into an interactive playground. However, you'll get the best results on a white, smooth and flat surface.

- Transform classroom **tables** for collaborative and developmental tabletop fun.
- Mount to a **Sensory Voyager** for interactive play on the go!

omiBudii Specification

Software & Content

Activity Suites

The omiBudii projector is supplied with non-editable software containing 120 different games and activities. The software license includes all standard effects, ball games, the catch game and any future games.

Running additional activity suites will, in the future, be possible using encrypted USB drives and will only run from the USB drive. Resellers will be able to create and upload their own 120 activities.

Standard Budii Content Suites

- Budii Sensory
- Budii ASN
- Budii Care

The first suite released will be the **Budii Sensory Suite**, which will include our most popular activities from the sensory suite:

- Over 70 standard interactive effects
- A selection of ball and catch games
- A selection of Autism Friendly Activities
- A selection of Educational Activities

Additional Budii suites, such as autism, travel, space, jungle, animals etc., are in development.
